

Improving National EVD and COVID-19 Preparedness and Surveillance Measures In Rwanda

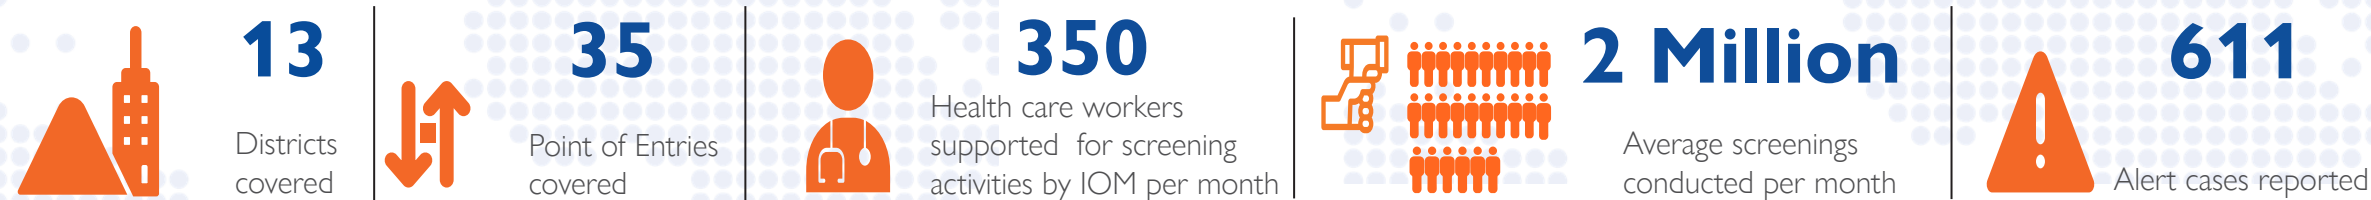

IOM RWANDA

Situation Report N.1, December 2019 - March 2020

Under the project “Improving National Ebola Virus Disease (EVD) and Coronavirus Diseases (COVID-19) Preparedness and Surveillance Measures in Rwanda” funded by the United Kingdom Department for International Development (DFID) through UNICEF, IOM Rwanda is strengthening health frontline workers’ capacities. This is being done, amongst others, through the provision of incentives to Rwandan health professionals who are conducting EVD and COVID-19 screenings at Point of Entries bordering Democratic Republic of Congo, Republic of Burundi, Republic of Uganda and the United Republic of Tanzania. Active surveillance in the form of screenings¹ at the Point of Entries enables early detection of travelers with suspected symptoms and may limit the spread of diseases into the country.

1. Screening is not testing for the virus but screening of risk factors (temperature, questions about travel history, etc).

GEOGRAPHICAL COVERAGE OF THE PROJECT ACTIVITY

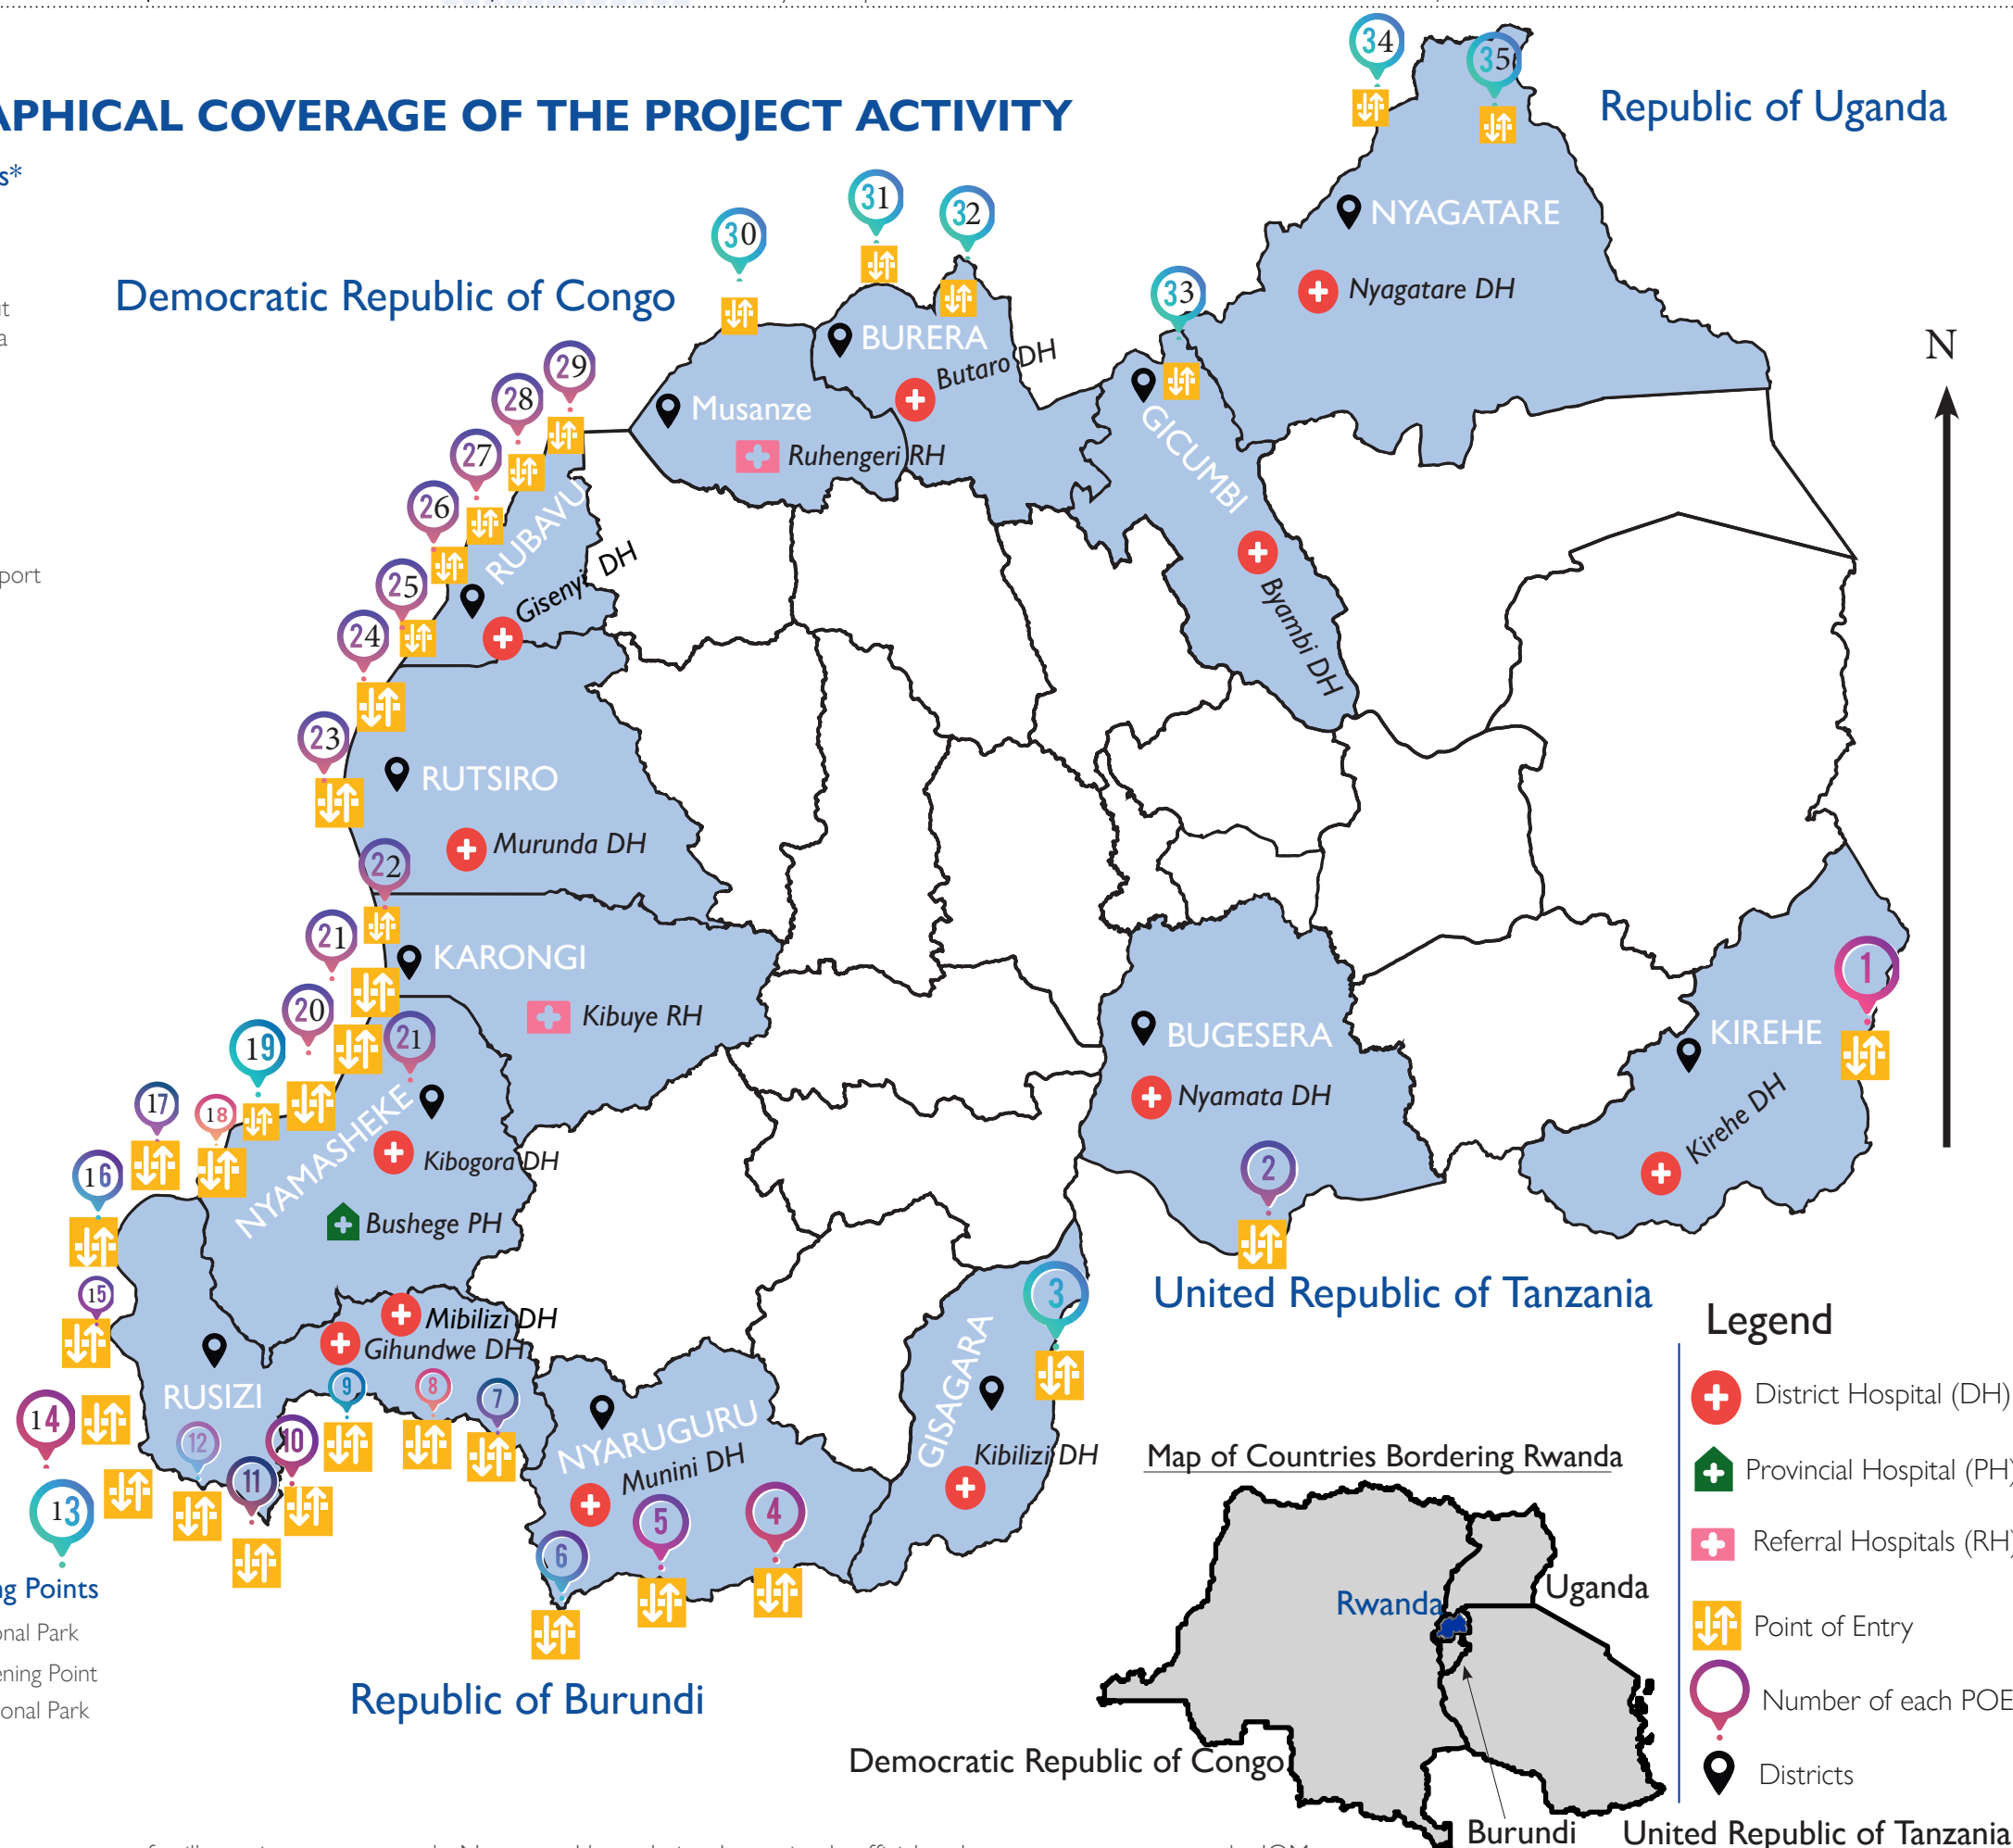

Point of Entries*

1. Rusumo
2. Nemba
3. Akanyaru Bas
4. Akanyaru Haut
5. Nshili- Remera
6. Bugarama
8. Ruhwa
9. Cogefar
10. Rusizi (i)
11. Rusizi (ii)
12. Hepfo
13. Sumoyamana
14. Kamembe Airport
15. Nkombo
16. Budike
17. Rugari
18. Kirambo
19. Nyamitaka
20. Shuguri
21. Mwaga
22. Ruganda
23. Nkora
24. Bugarura
25. La Corniche
26. Poids Lourds
27. Brasserie
29. Kabuhanga
31. Cyanika
32. Buhita
33. Gatuna
34. Buziba
35. Kagitumba

Some PoEs above also cover smaller crossing points in their area.

Other Screening Points

7. Nyungwe National Park
28. Rugerero Screening Point
30. Volcanoes National Park
